

DUAL RANGE

650-10-1 NEONATAL SCALE

The 650-10-1 neonatal baby scale precisely weighs even the most active babies, up to 33 pounds. Motiontrap™ movement compensation technology compensates for involuntary movements and provides a stable, accurate weight reading. Enhanced precision is essential especially when weighing premature infants. The 650-10-1 provides these precise weighments from zero to 10 pounds with accuracy within 0.05 ounces. A two-sided removable tray keeps babies safe and a built-in measuring tape ensures quick and easy measurements.

FEATURES

- LCD display
- Dual-range capacity for increased precision
