

Models and Weighing Systems

Series models:
Practum, Quintix and Secura

Model 1

Analytical balances, readability (0.1mg)

Weighing system EMC

For devices with and without a weight circuit up to 200g.

Model 2

Precision balances, readability (1mg)

Weighing system EMC

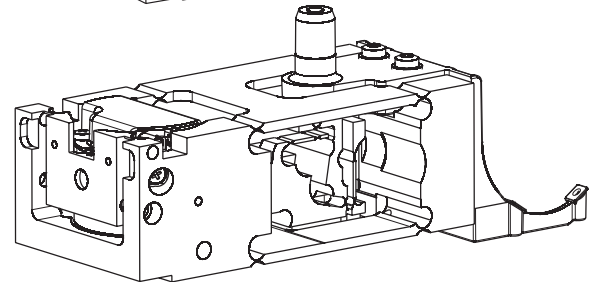

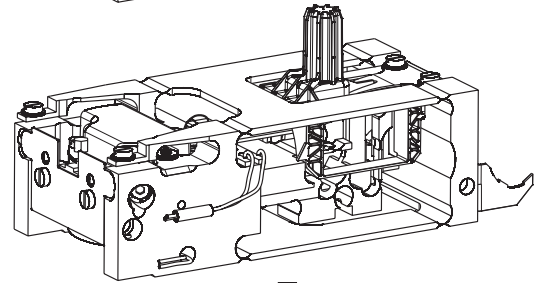

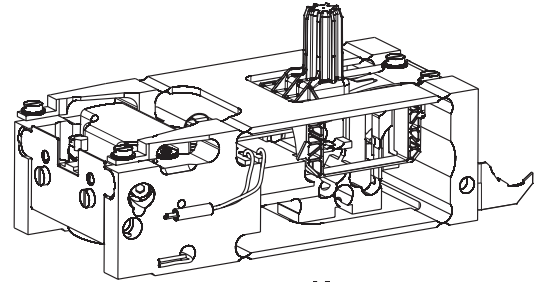

For devices with and without a weight circuit up to 1,500g.

Model 3

Precision balances, readability (10mg)

Weighing system EMC

For devices with and without a weight circuit up to 5,000g.

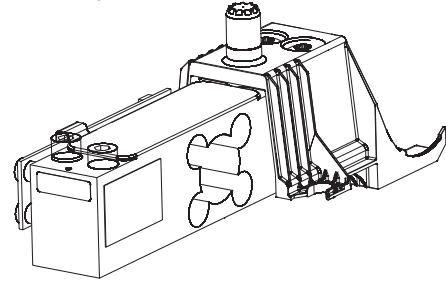

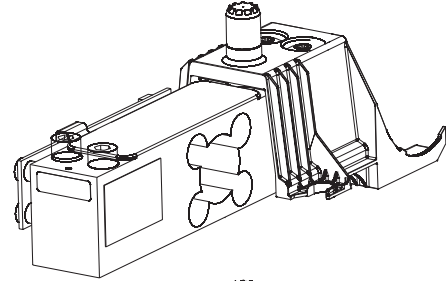

Model 4

Precision balances, readability (10mg)
Weighing system DMS
For devices with and without a weight circuit
up to 2,000g.

Model 5

Precision balances, readability (100mg)
Weighing system DMS
For devices with and without a weight circuit
up to 5,000g.

All systems are mounted on a carrier plate.
