

## DIRECT THERMAL STAINLESS STEEL LABEL PRINTER

The SURVIVOR® SST3™ is the first printer of its kind to achieve an IP69K rating. The ergonomically designed stainless steel cover completely seals out moisture and humidity, making it the only choice for washdown settings. This latest addition to the SST family adds faster processing speed, enhanced on-board memory, printer emulation, and more connectivity options than ever before. See what the SST3 has to offer. We think you're really going to like what you find.

\*The IntelliSEAQ (Intelligent Sequential Energy Adjustment for Quality) printhead contains a secured memory device that stores pertinent data about the electrical profile of the printhead as well as user operational data. IntelliSEAQ monitors, adjusts, and controls essential printhead functions. A PC-based software application extracts the information, imports it into an easy-to-read template which is displayed to the user.
