## Rice Lake positions checkweighers for extreme conditions

**Rice Lake, WI** — Heavy wash-down environments and HACCP requirements call for the CW-90X. The over/under CW-90X scale features hermetically sealed load cells, 304 stainless steel materials and has an IP69K rating to survive those daily sanitary wash-down treatments. The CW-90X also features the toughest keypad available in the industry today. The unique piezo keypad has no moving parts and is made to withstand sharp knife-point contacts and is resistant to all types of contaminants and liquids. Our commitment to the food processing industry compels us to obtain NSF certification for Rice Lake's CW-90X.

Rice Lake Weighing System's new CW-90 checkweigher is ideal for clean rooms, dry atmosphere environments and food processing plants that require dependable equipment that minimizes profit erosion during the manufacturing process. A simple communication bar graph LED indicates if a container is overweight, underweight or within an acceptable range. Rice Lake's under/over CW-90 checkweigher, with stainless steel construction and aluminum load cells, is built to perform dependably and accurately. Our commitment to the food processing industry compels us to obtain NSF certification for Rice Lake's CW-90 and CW-90X.

For more information, contact Julia Buergi, 800-472-6703 extension 5104, or go to [www.ricelake.com](http://www.ricelake.com).

Rice Lake Weighing Systems is a family-owned, ISO 9001 certified corporation, with headquarters, metrology laboratory and main manufacturing plant in Rice Lake, Wis. Additional manufacturing facilities are located in Jasper, Ala. and Newtown, Conn.
