Press Release

DIGI® DC-788 Series Counting Scale NTEP Approved

Rice Lake, Wis., September 15, 2008: With a recent NTEP approval for the 10 lb through 100 lb model and approved for 5,000 divisions, the DC-788 from Rice Lake Weighing Systems® is ready to weigh products sold by weight. This makes the DC-788 one of the most versatile scales on the market.

New to the DC-788 is an updated display, which enables operators to easily view quantities and simultaneous views of weight, unit weight, tare and quantity help to speed up any task. Net/gross weight display is standard with a lb/kg weight display conversion.

For non-Legal-for-Trade applications, the DC-788 offers an internal counting resolution of 1/1,000,000, along with an auto recomputing function, providing extreme accuracy. Negative sampling and counting allows counting out of a full container. The DC-788 provides the choice of unit weight per thousand or average piece weight.

The DC-788 also features full-duplex RS-232 output to a PC or printer. For counting on the go, the DC-788 offers true portability with an internal battery option to provide up to 24 hours of operation.

Rice Lake Weighing Systems is a family-owned, ISO-9001 registered company that designs, manufactures and distributes a complete line of industrial process control weighing equipment through a worldwide network of independent distributors. The headquarters, metrology laboratory and main manufacturing plant are located in Rice Lake, Wis., with additional manufacturing facilities located in Jasper, Ala., and Newtown, Conn.
