

Accessories and Cases

Guidelines for Selecting a Case:

Find the diameter, height
and total mass of the weights
that will need a case

Review case dimensions
to determine best fit

Note weight limits of the case
and choose accordingly

Things to keep in mind:

Foam needs 0.5 inches between weights and
edge of case

Always select the smallest case best fitting your need

Weights should always be stored and transported
in the upright position

The shoulder edge of the weight should be level
with the foam insert

Some cases are recommended for storage only and
should not be used for shipping
