## **SCHEDULE**

US Certificate of Conformity No: FM18US0307X

IP66, IP67 or IP68, depending on the model.

11. The marking of the equipment shall include:

Class I, II, III, Division 1, Groups A, B, C, D, E, F and G; T4 for  $-25^{\circ}\text{C} \leq T_a \leq +60^{\circ}\text{C}$ ;

12. **Description of Equipment:**

**General** – All of the load cells are transducers that create an electrical signal whose magnitude is directly proportional to the force applied. Electrical components are inside the load cell, protected using different systems: silicone coating, welded or screwed housing. The degree of protection against the ingress of foreign objects depends on the model and variant, and can be IP66, IP67 or IP68.

The operating principle of the load cells is by strain gauges glued onto an elastic body. The load cells work by bending beam, shear beam, or compression, depending on the model. The strain gauges form a full Wheatstone bridge.

Models with IP66 or IP67 rating are protected with a silicone coating. Models with IP68 rating are welded.

**Construction** – The construction material can be aluminum, alloy steel or stainless steel.

**Ratings** –  $U_i = 15\text{V}$ ,  $I_i = 0.288\text{A}$ ,  $P_i = 1.08\text{W}$ ;  
 $U_i = 13\text{V}$ ,  $I_i = 0.332\text{A}$ ,  $P_i = 1.08\text{W}$ .

See Annex.

13. **Specific Conditions of Use:**

Models RL1218A, RL26018A, RL42018A: See Annex.

All other models: None.

14. **Test and Assessment Procedure and Conditions:**

This Certificate has been issued in accordance with FM Approvals US Certification Requirements.

15. **Schedule Drawings**

A copy of the technical documentation has been kept by FM Approvals.
