# Platform Scales

Bench and floor scales are essential for ensuring recipe consistency, accurate inventory management, regulatory compliance and more. Rice Lake Weighing Systems' washdown platform scales are designed to be thoroughly cleaned without risking accuracy or durability.

## CW-90X OVER/UNDER CHECKWEIGHER

- Piezo keypad resists knifepoint contact
- High-intensity LED display shows weights clearly

**CW-90XB**

- Five-point overload protection safeguards sensitive components
- Frame engineered to meet strict sanitary design standards

**BENCHMARK® HE-X**

- Stainless steel removable cover for thorough sanitization
- Rugged platform with continuous welds reduces bacteria and remains stable in harsh washdowns

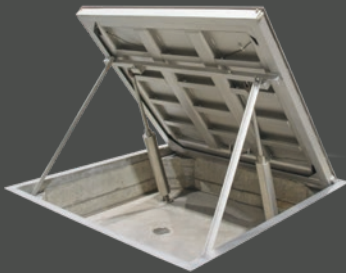

## ROUGHDECK® SD

- Polyethylene deck which can be manually removed for efficient washdown procedures
- Rigid 304 stainless steel tube frame with side brackets to contain top plate

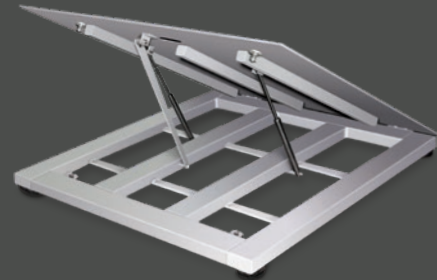

## ROUGHDECK® QC-X

- Operator is assisted by gas springs to open top plate 75° for easy cleaning and inspection
- Solid 304 stainless steel vertical plates with continuous welds leaves no room for product to collect and harbor bacterial growth

## AUTOLIFT HE

- Pneumatic air cylinders attached to an intermediate frame lifts and lowers the scale in the pit with the turn of a key switch
- Stitch welded 304 stainless steel scale with intermediate frame and pit coping

## ROUGHDECK® QC

- Sanitation team can use gas spring assist to open the top cover 24-37°
- Lower frame is rigid 304 stainless steel tubing with all bulkheads welded closed

Portion Scale

## VERSA-PORZION®

- Compact bench scale with an IP68 rating and stainless steel construction
- Optional battery creates a portable weighing solution

Precision Balance

## TS SERIES

- Easy-to-clean, durable and space-saving solution for recipes, quality control and more
- IP65 rating protects sensitive components from dust and liquids

# In-motion Solutions

MotoWeigh® in-motion systems are customizable and seamlessly integrate into any process. Built with food-grade stainless steel, these durable systems are designed for demanding industrial applications.

## SYSTEM OPTIONS

MotoWeigh dynamic checkweighers are easily customizable to ensure every application has the optimal checkweighing solution. Facilities can choose multiple options to enhance their system, such as Legal for Trade approval at up to 60 products per minute.

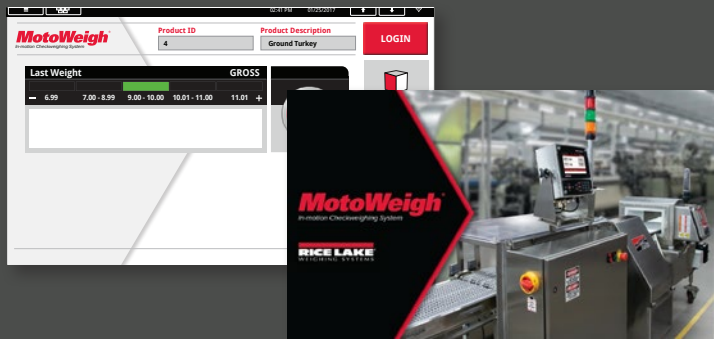

Other options include:

- Reject systems
- Alarms
- Guides and shields
- Remote emergency stop
- Stack lights

## METAL DETECTORS

Eriez® metal detection systems are designed to detect small ferrous, non-ferrous and stainless steel contaminants, making them ideal for facilities with products that vary in size, shape and orientation. Food-grade stainless steel washdown models can be quickly disassembled for cleaning and sanitation.

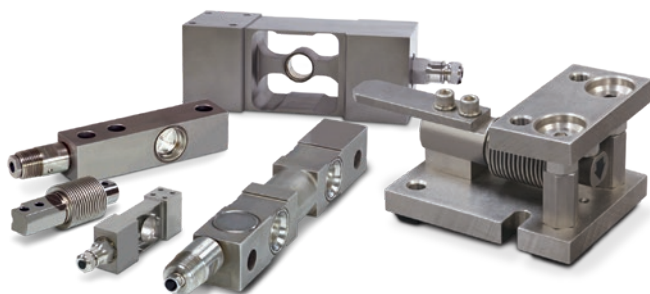

Printer

## SURVIVOR® SST4

The SURVIVOR SST4 is specifically designed for tough washdown environments. With speeds up to 10 inches per second, the SST4 can quickly print a wide range of information and resist high-pressure jets with its IP69K rating.

## LOAD CELLS AND MOUNTS

Rice Lake offers the industry's largest selection of load cells and mounts, including models specifically designed for washdown applications. Rice Lake's distributor network and in-house application specialists can help select the best solution for any application.

## MONORAIL SCALES

Legal for Trade in 750- and 1,500-pound capacities, permanent and portable monorail scales are safe and precise solutions for weighing meat. Each food-grade system features a washable console that transmits weight data to printers, computers or electronic record systems.

# Instrumentation

Rice Lake offers reliable weight indicators and remote displays designed for washdown applications. These solutions feature an IP66 rating or higher to ensure accurate measurements without risk of damage from moisture or debris.

Safeguard sensitive electronics from moisture and debris by selecting equipment with the proper ingress protection.

<b>IP69K</b>	Dust tight and withstands high-pressure, high-temperature water
<b>IP68</b>	Dust tight and protects against water while submerged at 15 meters deep
<b>IP67</b>	Dust tight and protects against water while submerged at one meter deep
<b>IP66</b>	Dust tight and protects against high-pressure water projected from any direction
<b>IP65</b>	Dust tight and protects against low-pressure water projected from any direction
