SURVIVOR[®] ATV SERIES

PORTABILITY

Meets Performance

Engineered with the unbeatable performance standards of every SURVIVOR product, the SURVIVOR ATV portable truck scale brings heavy-capacity weighing to non-permanent sites. The low profile, compact weighbridge is robust, constantly standing up to tough demands of temporary aggregate mining, construction or timber operations. With a steel deck welded to twelve 12-inch, wide flange, 14-pound structural steel I-beams, the SURVIVOR ATV is constructed with more steel content than competitive models for superior endurance and longevity.

G-Force™ self-checking mounting system

Rice Lake's G-Force self-checking mounting system eliminates excess movement and scale wear by using 100 percent of the gravitational force from the loading action against itself, returning the scale to center without check rods or bumper bolts.

Standard Bulkheads

Reinforced bulkheads are heavily braced for high-compression. Bulkheads are removable for easy expansion and use with optional steel ramps or concrete approaches.

Easily Expand or Transport

Easy to set up, expand and transport to different sites, the SURVIVOR ATV is designed to change with your business. Versatile modules are factory-wired and preassembled with self-seating hinge joints to make it easy to add or remove sections and exactly fit your specific application requirements.

TOUGHEST TRUCK SCALES ON EARTH®

Your Investment—Installed Fast

The SURVIVOR ATV's self-contained scale modules are installed and relocated easily, minimizing setup time. Simply unload modules on level compacted gravel or concrete, backfill to bulkheads and finish ramps, wire instrumentation and calibrate the system to begin weighing.

1 Self-contained scale modules.

2 Unload modules on level, solid ground.

3 Backfill to bulkheads and finish ramps.

4 Wire instruments, calibrate and weigh.

Built Tough, Start to Finish

Every SURVIVOR ATV scale is proudly made onsite at Rice Lake Weighing Systems. All weighbridge components are shot-blasted and cleaned of debris, grease and oil. After welding and assembly, each scale is painted with a high-performance epoxy primer, followed by a finish of hard-coat, high-solids urethane primer and paint.

End Cleanout Area

Standard end cleanout eases debris removal to help maintain scale accuracy.

SURVIVOR® ATV SERIES

PERFORMANCE

- Up to 270,000 lb full scale capacity
- 100,000 lb concentrated load capacity (CLC)
- 75,000 lb capacity load cells
- Faster, more accurate weighments and less wear with G-Force mounting system

VERSATILITY

- NTEP Certified widths to 16.5 feet
- Preamsembled modules for easy installation, expansion and relocation
- Load cell protection system for stable transport
- Optional steel approaches and ramps

VALUE

- Five- or twelve-year warranty includes weighbridge, load cells, junction boxes and suspension systems
- Lightning protection package
- Manufactured in accordance to ISO 9001 guidelines
- Extensive five-step finishing process provides superior scale protection

SURVIVOR[®] ATV SERIES

Automate Your Truck Scale

Build automation into truck scale operations with peripheral scale accessories, advancing safety and efficiency for heavy-capacity applications.

Boost Process Efficiency

Ultimately allowing more trucks to move over the scale, automation improves traffic flow at any site and reduces data input errors. Trucks can be preassigned an identification number and routed through the weighing site with one or multiple traffic lanes, requiring fewer stops. Transfer weight data quickly with a variety of communication options, high-speed printing and customizable software. Automation gets drivers back on the road faster—delivering more product and yielding better profits.

Products

Safety

Automated Systems Add Safety

Rice Lake offers automated kiosks and truck scale accessories to promote safety for truck drivers and site employees. Ticketing kiosks allow drivers to check in, weigh in and out, and print tickets automatically without exiting the cab of the truck. Traffic signals, gates and remote displays can be queued to route trucks safely and quickly through the weighing process, minimizing driver time on the property.
