## 1. OVERVIEW

The Uni-7 may be configured as a self-serve scale which allows customers to weigh and label their purchases. This reduces the workload of the clerks at check out to simply scanning a barcode rather than looking up PLUs and weighing purchases.

When the Uni-7 is configured in self-serve mode the operation is greatly simplified to a basic operation of selecting the PLU and printing a label. PLUs can be recalled by number or by category and preset key.

## 2. CONFIGURATION

2.1 Set the Sales Mode to Self Serve:

Setup menu, Sales Mode = SELF-SERVE

Power the scale off as instructed.

- 2.2 After the Uni-7 is configured in Self-Serve mode the menus are accessed by: **495344**, **MODE** then **495344**, **PLU**.
- 2.3 Select either Preset key or Numeric 10-key operation:Setup menu, Operation Setting, Self tab, Self Type = PRESET or NUMERIC
  - NUMERIC [7][8][9] = 7, 8, 9 across the top row of the numeric keypad
  - NUMERIC [1][2][3] = 1, 2, 3 across the top row of the numeric keypad

Enable text search as needed: **Search Key** = USE.
