The WM-Ai auto wrapper and IP-Ai pre-pack scale can display and print PLU information in Chinese BIG5 characters, also known as Traditional, but all menus, etc. remain in English. Chinese characters are entered in SLP-5 and sent to the wrapper and scale; Chinese characters cannot be entered at the wrapper and scale. Refer to the following procedure to configure SLP-5.

Refer to the WM-Ai auto wrapper and IP-Ai pre-pack scale release notes for details to load the firmware.

WRAPPER AND SCALE SETUP

Update the firmware for the WM-Ai auto wrapper and IP-Ai to version **C2225x**. Refer to the C2225x release notes for details.

SLP-5 SETUP

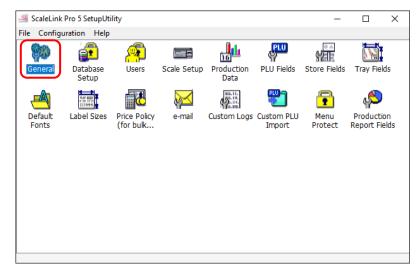

Because the character size is fixed in the label format PLU description, it is only necessary to enable one Chinese BIG5 font.

• 32x32 (Chinese) - Large (Item Name)

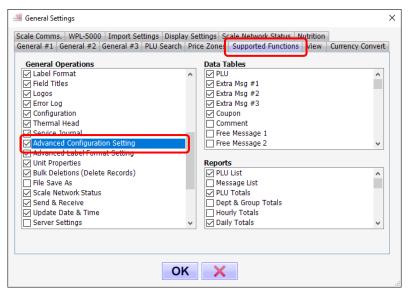

The following Chinese BIG5 character sizes are also available. These should only be added if Uni-3, Uni-5, Uni-7, or WM-Nano models are in the same installation. These models require the character sizes to be specified in the PLU description and sent from SLP-5.

- 48x48 (Chinese) Very Large (Item Name)
- 24x24 (Chinese) Medium (Messages)
- 16x16 (Chinese) Small (Ingredients)

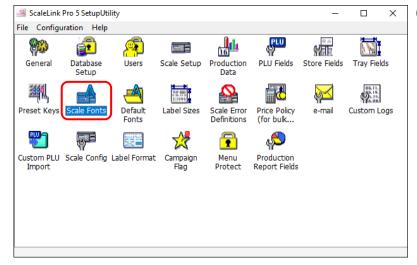

Note: English (ASCII) and Chinese BIG5 (traditional) characters <u>cannot</u> be mixed on the same line. If both are present only the first character type on the line is used.

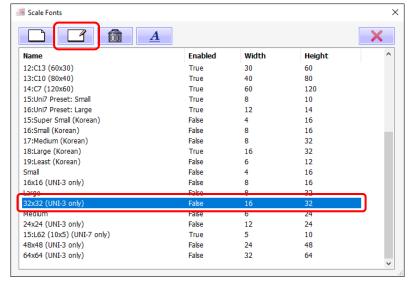

- 1. Open **Setup Utility**.
- 2. Select "General".

- 3. Select "Supported Functions".
- Enable "Advanced Configuration Setting".
- 5. Select "OK".

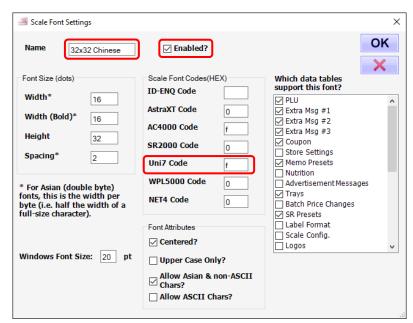

6. Select "Scale Fonts"

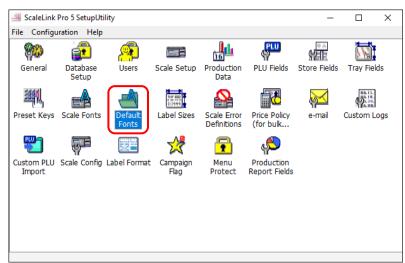

The list of "Scale Fonts" is displayed.

- 7. Choose "32x32 (Uni-3 only)"
- 8. Click "Edit".

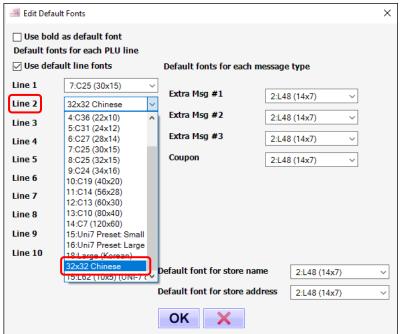

- 9. Rename as "32x32 (Chinese)".
- 10. Check "Enabled?".
- Set the Uni-7 "Scale Font Codes (HEX)" value as "f" (same value as AC-4000).
- 12. Click "OK".
- 13. If the Uni-3, Uni-5, Uni-7, or WM-Nano are also installed, repeat for the remaining three Chinese fonts:
 - 16x16 (Chinese) = "6"
 - 24x24 (Chinese) = "c"
 - 48x48 (Chinese) = "1f"

14. Select "Default Fonts".

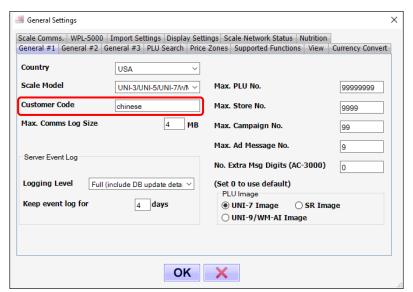

This is to set which line is Chinese BIG5 and which line is English.

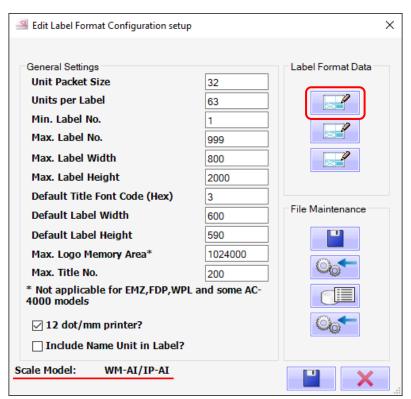

At the "Edit Default Fonts" screen select the font for each line.

Select one line for Chinese characters and the other for standard English characters.

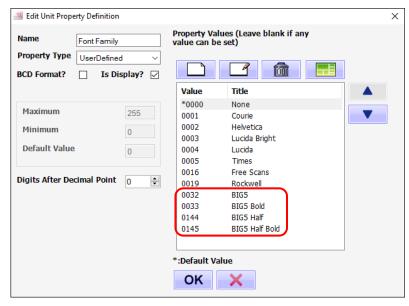

- 15. Set "Line 1" to size "**7:C25**" or "**5:C31**". Change "Line 2" to "**32x32 (Chinese)**".
- 16. Select "**OK**" when finished.

- 17. Select "General" again.
- 18. Enter "Chinese" in the "Customer Code" field.
- 19. Select "OK" when finished.

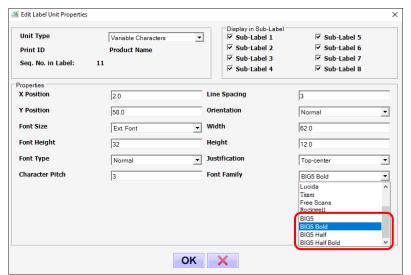

- 20. Select 'Label Format".
- 21. Select "WM-Ai / IP-Ai".
- 22. Select "Unit Properties Setup".

- 23. Select "Font Family".
- 24. Select "New".
- 25. Add the four Chinese fonts:
 - 32: BIG5
 - 33: BIG5 Bold
 - 144: BIG5 Half
 - 145: BIG5 Half Bold
- 26. Click "OK".
- 27. Click "X".
- 28. Click "Save".
- 29. Click "X".

This completes the Setup Utility configuration for Chinese characters.

- 1. Open Maintenance Utility.
- 2. Open the label format.
- 3. Edit the Product Name properties as follows.
 - · Font Size: Ext. Font
 - Font Height: 24~32
 - Font Family: BIG5,

BIG5 Bold, BIG5 Half, or BIG5 Half Bold

- 1. Open ScaleLink Pro 5.
- 2. Edit a PLU.
- When editing the description, confirm the second line is set as "32x32 (Chinese)". The first line is set as a standard English font.

Ext. Font, BIG5 Bold Font Height = 24 (SLP-5), 18 [Hex](Ai) Ext. Font, BIG5 Bold Font Height = 32 (SLP-5), 20 [Hex] (Ai)
