

DUAL RANGE

650-10-1

NEONATAL SCALE

The 650-10-1 neonatal baby scale precisely weighs even the most active babies, up to 33 pounds (15 kilograms). Motiontrap™ movement compensation technology compensates for involuntary movements and provides a stable, accurate weight reading. Enhanced precision is essential especially when weighing premature infants. The 650-10-1 provides these precise weighments from zero to 10 pounds (5 kilograms) with accuracy within 0.05 ounces (1 gram). A two-sided removable tray keeps babies safe, and a built-in measuring tape ensures quick and easy measurements.
