

DIMENSION ANYTHING, ANYWHERE

Rice Lake Weighing Systems' iDimension® Flex Series is a versatile dimensioning solution that fits the needs of any facility. Customization ensures every dimensioner is individualized to the needs of each application. Free-standing or suspended models provide flexibility depending on facility layout, and the number of sensors can be changed to meet application requirements. The iDimension Flex comes with Rice Lake's iDimension SS integration software, which allows it to connect with existing ERP, TMS, WMS or other software systems. Make dimensioning simple with Rice Lake's iDimension Flex.

MODEL	IDEAL APPLICATION	MINIMUM	MAXIMUM
Flex-2	Dimensioning large packages or parcels on conveyors.	*6 x 6 x 6 inches	84 x 40 x 40 inches
