# Simple and Efficient Operation

PC-based operation allows for faster response and remote support access.

## Durable Control Panel

The Ishida Uni-10 retail scale provides more flexibility and features to ensure you have complete control. Grocery stores require employees to wear gloves when directly handling food. The Uni-10's resistive touch panel provides control for operators wearing gloves without sacrificing durability. The scale's control panel has a flat design, making it easy to clean and sanitize.

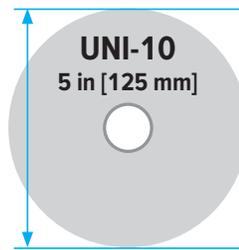

The Uni-10 has a 12.1-inch operator display for more visibility and to view larger graphics.

## Large Weighing Platform

The Uni-10 has a generous weighing platform to ensure products do not hang over the edge, providing more accurate and accurate and reliable weighments. The rectangular platter of the hanging scale supports oversized items such as whole fish, large cuts of meat, deli platters and more.

## Expansive Label Roll Capacity

With a 5-inch label roll capacity, the front-load label cassette allows operators to easily change labels in a comfortable position, making it easy to quickly load labels, even during busy times.

## FDA Nutrition Labeling

The Uni-10 is compliant with the latest nutrition label requirements. According to the FDA, new labels reflect current scientific evidence leading to a healthier lifestyle.
